

KISHOR HADIYA

MERN Stack Developer

📍 Ahmedabad, India — ✉️ hadiyakishor01@gmail.com — 🌐 [Portfolio](#) — [LinkedIn](#) — [GitHub](#)

Professional Summary

MERN Stack Developer with hands-on experience building responsive and full-stack web applications using React.js, Node.js, Express.js, MongoDB, REST APIs, and JWT authentication. Experienced in component-based UI development, API integration, database design, authentication, and deploying applications using modern cloud platforms. Seeking a Software Engineer / React.js Developer opportunity to contribute to real-world products and continue growing as a full-stack developer.

Technical Skills

Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design
Backend	Node.js, Express.js, RESTful APIs, JWT Authentication
Database	MongoDB, MySQL
Tools & Cloud	Git, GitHub, Postman, VS Code, Vercel, Render

Featured Projects

Veloura – Premium Event Management Platform2026

React.js, Tailwind CSS, Node.js, REST API

- Built a responsive event booking platform using component-based React.js architecture with reusable UI modules.
- Implemented dynamic event listings with multi-filter search, category filtering, featured event carousels, and detailed event pages.
- Developed end-to-end ticket booking workflows including QR-code-based tickets, booking history, and user dashboards.
- Optimized layouts and rendering for mobile, tablet, and desktop devices to provide a consistent responsive experience.

Assignment Management System – EduFlow2024 – 2025

MongoDB, Express.js, React.js, Node.js (MERN)

- Developed a full-stack academic management platform using the MERN stack for creating, submitting, evaluating, and tracking assignments.
- Built separate workflows for students and instructors, including assignment creation, submission management, grading, and progress tracking.
- Implemented JWT-based authentication and Role-Based Access Control (RBAC) to securely manage student and instructor permissions.
- Designed MongoDB data models using Mongoose and integrated RESTful APIs with the React.js frontend for efficient data management.
- Developed interactive analytics dashboards using Recharts to visualize assignment performance and student progress.
- Created a responsive user interface optimized for desktop, tablet, and mobile devices.

Money Management System2026

MongoDB, Express.js, React.js, Node.js

- Developed a full-stack personal finance management application using the MERN Stack for tracking income, expenses, budgets, and financial goals.
- Built a responsive and interactive React.js frontend with reusable components, dynamic forms, and real-time financial data updates.
- Developed RESTful APIs using Node.js and Express.js to manage users, transactions, categories, budgets, and financial records.

- Integrated MongoDB and Mongoose for efficient database management, including storing and retrieving user and transaction data.
- Implemented secure JWT-based authentication and protected routes to ensure authorized access to user-specific financial data.
- Created interactive dashboards and financial visualizations to help users analyze income, expenses, and overall spending patterns.

Education

Bachelor of Computer Applications (BCA)

82.55%

2023 – 2026

T.N. Rao Institute of Management Research & Technology – Rajkot, Gujarat, India

Relevant Coursework: Data Structures & Algorithms, Web Technologies, Database Management Systems (DBMS), Software Engineering, Computer Networks
